

Removal of Persistent Organic Pollutants (POPs) and Inorganic Nutrients from Soils, Sediments, and Wastewater

Guest Editors:

Dr. Francesco Bianco

Dr. Grazia Policastro

Dr. Marco Race

Prof. Dr. Andrea Petrella

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Sustainable techniques (e.g., physical–chemical, biological) for treating POP and/or inorganic nutrient-containing soils, sediments, or wastewaters.
- The identification and/or use of novel bacteria/plants/microalgae for biological treatments (e.g., bioremediation, bioaugmentation, aerobic oxidation, anaerobic digestion, phytoremediation, nitrification).
- The manufacturing and/or employment of renewable adsorbents (e.g., biochar) for POP/inorganic nutrient adsorption.
- The use of biodegradable and/or cost-saving chemicals for improving biological and physical–chemical approaches (e.g., biosurfactants, chelating agents).
- Lab-, pilot- or full-scale experiences for soil/sediment remediation and wastewater treatment.
- Integrated approaches (e.g., soil washing and bioremediation).
- Economic assessment for remediation strategies.

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspecc**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
