Message from the Guest Editors

This Special Issue aims to showcase state-of-the-art research and advancements in sustainable additive manufacturing, emphasizing the critical aspects of design, processes, and production control. We are seeking contributions that explore new approaches, methodologies, and technologies to reduce environmental impact, optimize resource utilization, and promote a more sustainable future for additive manufacturing.

Potential topics of interest include, but are not limited to, the following:

- Innovations in eco-friendly materials for additive manufacturing;
- Energy-efficient and resource-conscious additive manufacturing processes;
- Life cycle assessments and environmental impact studies of additive manufacturing techniques;
- Integration of renewable energy sources in additive manufacturing facilities;
- Recycling and waste reduction strategies in additive manufacturing;
- Novel designs and strategies for enhancing material efficiency in additive manufacturing;
- Advances in real-time monitoring and control systems for sustainable production.

Deadline for manuscript
submissions:

30 January 2025

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
