

Role of Intelligent Control Systems in Industry 5.0

Guest Editors:

Dr. Scarlett Chen

Chemical and Biomolecular
Engineering, University of
California, Los Angeles, CA 90095,
USA

Dr. Zhe Wu

Chemical and Biomolecular
Engineering, National University
of Singapore, Singapore 117585,
Singapore

Dr. Youzhi Liang

Department of Computer
Science, Stanford University,
Stanford, CA 94305, USA

Deadline for manuscript
submissions:

15 October 2024

Message from the Guest Editors

Dear Colleagues,

Coming from a more holistic perspective, Industry 5.0 recognizes the industry's power to fulfill societal needs beyond employment and growth, and therefore aims to provide resilient prosperity by making production respect the limitations of our environment and employee capacity. The study of existing tools in Industry 4.0, along with the exploration of new tools in today's world, are all technologies that will help define the scope and enable the advent of Industry 5.0. The concept of Industry 5.0 remains a novel topic that is yet to be clearly defined; nevertheless, intelligent control systems play an important role, especially when combined with the state-of-the-art artificial and linguistic intelligence. This Special Issue seeks high-quality studies on the latest studies on the design and optimization of intelligent control systems, with topics including but not limited to:

- Human–machine interaction;
- Digitalization (augmented, virtual, and mixed technology);
- Speech recognition;
- Collaborative robots;
- Cyber security;
- Big data and analytics;
- Internet Of Things;
- Smart grids.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
