### **Message from the Guest Editors**

This Special Issue on “Energy Conservation and Emission Reduction in Process Industry” aims to summarize the latest progress in the theory and application of energy conservation and emission reduction in process industry to address the long-term challenge of high-energy consumption and high pollution and promote sustainable development of the process industry. Topics include, but are not limited to:

- Innovations for sustainable process industry
- Process modeling and optimization for energy conservation and emission reduction
- Waste minimization and valorization
- Sustainable supply chain management for process industry
- Sustainability assessment with life cycle perspective

Deadline for manuscript submissions:

**closed (7 December 2021)**

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
