Wastewater Treatment Processes

Guest Editors:

Prof. Dr. Kostas A. Matis
Laboratory of Chemical and Environmental Technology, Department of Chemistry, Aristotle University, GR-541 24 Thessaloniki, Greece

Prof. Dr. George Z. Kyzas
Department of Chemistry, International Hellenic University, 65404 Kavala, Greece

Deadline for manuscript submissions:
closed (15 December 2021)

Message from the Guest Editors

Typical processes that are investigated and applied to wastewater treatment can be the following: Biological, adsorption, flocculation, oxidation, membranes, filtration, and so on, including the nanotechnological. This Special Issue on "Wastewater Treatment Processes" seeks high-quality works and topics (not only those) focusing on the latest novel wastewater processes, including biological, adsorption, flocculation, oxidation, membranes, filtration, etc.

Special Issue

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
