Multi-GNSS: Methods, Challenges, and Applications (Second Edition)

Guest Editors:

Prof. Dr. Jong-Hoon Won
Department Electrical and
Computer Engineeing,
Engineering School, Inha
University, Incheon 22212,
Republic of Korea

Prof. Dr. Nobuaki Kubo
Department of Maritime Systems
Engineering, Tokyo University of
Marine Science and Technology,
Tokyo 135-8533, Japan

Deadline for manuscript
submissions:
30 June 2024

Message from the Guest Editors

A Special Issue of the open access journal *Remote Sensing* (ISSN 2072-4292) has been launched, with a focus on 'Multi-GNSS: Methods, Challenges, and Applications'. This Special Issue aims at studies covering recent advances and future challenges in GNSS technology for various research investigations as well as a range of practical applications. We encourage both theoretical and applied research contributions on the use of GNSS technology in all disciplines. Topics may cover anything from the GNSS algorithms and applications for remote sensing, atmospheric modeling and applications to more comprehensive aims and scales. Hence, GNSS receivers, positioning algorithms, important contemporary applications, and software tool developments for data collection and processing, as well as their applications in various fields are welcome.

Special Issue

Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.
Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
