Urban Planning Supported by Remote Sensing Technology II

Guest Editors:

Dr. Christiane Weber

DR CNRS, TETIS Research Unit,
AgroParisTech, CIRAD, CNRS,
Irstea, Maison de la
Télédétection, 500 rue Jean-
François Breton, 34000
Montpellier, France

Dr. Jingxia Wang

1. Department of Urban Studies
and Planning, The University of
Sheffield, Western Bank, Sheffield
S10 2TN, UK
2. Institute of Geography, Ruhr
University Bochum, 44801
Bochum, Germany

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

This is the second Special Issue concerning the contributions of Urban Planning Supported by Remote Sensing Technology.

Numerous applications can illustrate the interest of imagery in urban planning practices, and several tools or applications can be described in various contexts. This Special Issue might be the opportunity to share experiences, at various scales (urban project to metropolitan planning issue), and to confront both contextual positions, methodological choices and developments, and results for various countries or regions.

Suggested themes and article types for submissions:

Artificial and sealed surfaces monitoring;

Urban disaster management;

Subsidence monitoring;

Biodiversity monitoring;

Urban vegetation monitoring;

HUI and SHUI determination and monitoring;

Urban ecological infrastructure;

Nature-based solution;

Citizen sciences;

Sensors capacities and future development;

Enhanced methodologies, such as deep learning, spectral fusion, time-series analysis;

Data mining;

Data analyses;

Urban indicators.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
