

Monitoring Geohazard from Synthetic Aperture Radar Interferometry

Guest Editors:

Dr. Benedetta Antonielli

Department of Earth Sciences
and Research Centre for
Geological Risks (CERI) of The
University of Rome "Sapienza",
Rome, Italy

Prof. Dr. Francesca Bozzano

Department of Earth Sciences
and Research Centre for
Geological Risks (CERI),
University of Rome "Sapienza",
Rome, Italy

Prof. Dr. Paolo Mazzanti

Department of Earth Sciences,
University of Rome "Sapienza",
Rome, Italy

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

This Special Issue calls for papers dealing with monitoring, mapping, analyzing, and modeling natural and human-induced geohazards, as well as the mitigation of geohazards and risk assessment by the use of satellite SAR Interferometry.

This Special Issue invites both research papers and review articles on recent advances in SAR/InSAR applications for ground deformation monitoring, as well as advances in mechanism interpretation of geological processes based on time-series deformation measurement, and integration of InSAR data with other geodetic observations (e.g., GPS, leveling).

Themes welcome in this Special Issue include, but are not limited to:

- Landslides;
- Volcanic processes;
- Land subsidence;
- Sinkholes;
- Mining activities;
- Seismic and tectonics;
- Structures or cities affected by geohazards.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
