Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to investigate matters relating to:

- 1) technologies for sea observation and monitoring (waves, currents, bathymetry, wind);
- 2) monitoring of water chemical and physical parameters;
- 3) assimilation of marine coastal and deep environment data into numerical models;
- 4) technology and techniques for oil spill detection and analysis;
- 5) technologies and techniques for ships and objects detection.

Dr. Francesco Serafino

Dr. Claudio Lugni

Prof. Maurizio Brocchini

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
