

an Open Access Journal by MDPI

Measuring, Monitoring and Exploring the Ocean: From Coast to the Deep Sea

Guest Editors:

Dr. Andrea Munafo

Marine Autonomous and
Robotics Systems, National
Oceanography Centre,
Southampton SO14 3ZH, UK

Dr. Gabriele Ferri

NATO-STO Centre for Maritime
Research and Experimentation,
19127 La Spezia, Italy

Dr. Michael Jakuba

Woods Hole Oceanographic
Institution, Woods Hole,
Massachusetts, MA 02543, USA

Deadline for manuscript
submissions:

closed (30 June 2020)

Message from the Guest Editors

This article collection aims at gathering together the marine robotic and marine science communities, to present current work and achievements using robotics, smart instrumentation, and sensor networks to measure and observe the ocean with a level of spatial and temporal resolution that would not be possible otherwise. Submissions highlighting unsolved problems and challenges in delivering the next generation of marine observing systems are particularly encouraged.

Topics include but are not limited to:

- Marine observatories
- Smart sensors
- Autonomous robots and mobile sensors
- Sensor networks
- Integration of remote sensing and in situ measurements
- Adaptive sampling
- Remote sensor management
- Planning and sensor allocation
- Targeted and intelligent sampling
- Active perception
- Situational awareness
- Ocean field measurement and tracking
- ...

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
