Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in Resources (ISSN 2079-9276). Resources is an international, peer-reviewed, open access journal (free for readers), which publishes scientific studies related to resources.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted to the Editorial Office online at www.mdpi.com. Detailed instructions for authors are also available online: www.mdpi.com/journal/resources/instructions/

Resources is a new journal and publication fees are fully waived for papers submitted in 2014. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Professor Richard F. Kazmierczak, Jr.
Editor-in-Chief
Resources Editorial Office

Aims & Scope

Resources is an international scholarly open access journal on natural resources. It publishes reviews, regular research papers, communications and short notes, and there is no restriction on the length of the papers.

Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and methodical details must be provided so that the results can be reproduced.

There are, in addition, unique features of this journal:
- Manuscripts regarding research proposals and research ideas will be particularly welcomed.
- Electronic files and software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Subject areas:
- Natural resources
- Water resources
- Mineral resources
- Energy resources
- Land resources
- Plant and animal resources
- Genetic resources
- Ecology resources
- Resource management and policy
- Resources conservation and recycling

Resources regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: www.mdpi.com/journal/resources/

Open Access. What does it really mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford. Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need — no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
