Message from the Guest Editors

Dear Colleagues,

Sustainability, local development, and ecology are keywords that cover a wide range of fields of research, including both experimental and social sciences. The transversal nature of this area creates synergies but also divergences, making a continuous review of the existing literature necessary to facilitate research. In recent years, there has been an increasing number of articles that analyze trends in literature and the state-of-the-art in any subject. This Special Issue of *Resources* seeks to discover future research lines for natural resources as well as to analyze past research from economic, social, and environmental perspectives. Of particular interest is theoretical research about the retail sector, local development, and sustainability. Bibliometric methods are especially welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*Nature and Landscape Conservation*)
