Deadline for manuscript  
submissions:

**closed (15 September 2024)**

### Message from the Guest Editor

The release of the Microsoft Kinect sensor in 2010 revolutionized active 3D sensing. Although originally intended for the gaming community, the Kinect early on found its place in the research and commercial development. Its relatively high accuracy, ease of use, AI-enabled body and facial tracking, multi-microphone sound capture, and affordability have sparked novel applications in rehabilitation, telemedicine, surveillance, 3D scanning, and many other areas.

This Special Issue seeks submissions of original research papers describing novel applications with Kinect sensors that focus on its sensing properties, 3D measurements, multi-modal data fusion, point cloud segmentation, object recognition, human–computer interaction (HCI), and user experience (UX) in various areas, from biomechanics to mixed reality. The submitted paper should include previously unpublished work that demonstrates novel research contributions relevant to *Sensors* journal topics.

Keywords:

- 3D Measurement
- Computer Vision
- Depth Sensor
- Data Fusion
- Human–Machine Interaction
- Microsoft Kinect
- Mixed Reality

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
