Message from the Guest Editors

Advanced machines and robots require high redundancy and robust sensor systems under variations of the environments that surround them. For this purpose, current intelligent sensor systems adopt multi-modal sensor integration, sensor networks, and machine learning based sensor fusion. In this Special Issue, we will focus on the new, state-of-the-art sensor fusion of the advanced machines and robots to combine new sensors and their intelligence.

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
