### Message from the Guest Editors

Fiber-optic sensors have been widely used in the last 40 years and are gaining more and more acceptance for their compact size, immunity to electromagnetic interference (EMI) and survivability in harsh high-temperature/humidity environments.

This Special Issue will focus on both traditional and emerging fiber-optic sensors and their applications. Topics about novel sensor design, advanced manufacturing processes, new signal processing algorithms, field test installations, monitoring, and solutions are all welcome.
