Message from the Guest Editor

Dear Colleagues,

This Special Issue is focused on new developments in the area of sensors and sensor-based algorithm design that could facilitate management of chronic conditions including enabling doctors to provide personalized care, empowering patients to be engaged in taking care of their own health, and helping home caregivers and care providers to keep the elderly in their homes rather than moving them to assisted-living centers. Some of examples of these sensors/algorithms could be new sensors to monitor cognitive impairment and dementia, sensors to reduce risk of readmission risk and care post hospital discharge, sensors to monitor frailty, sensors to improvement care management for those suffering from dementia, sensors to improve patient adherence, sensors to better monitor sleep and stress, sensors for remote monitoring health and wellbeing [...]

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
