Message from the Guest Editors

The aim of this Special Issue is to solicit papers from academia and industry researchers with original and innovative works on all aspects of topology control and protocol in sensor networks and IoT applications, which review and report on start-of-the-art, highlight challenges, and point to future directions.

Topics of interest include, but are not limited to:

- Topology management in IoT and sensor networks
- Topology construction and maintenance algorithms
- Failure detection in IoT and sensor networks
- Failure tolerant in IoT and sensor networks
- Power control and power management
- Testbed, benchmark, and simulation studies in IoT and sensor networks
- Security and privacy issues in topology control of sensor networks

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
