Deadline for manuscript submissions:
closed (30 June 2018)

Message from the Guest Editors

Dear Colleagues,

Advances in pervasive sensing and computing are transforming the landscape of opportunities for mental health researchers and practitioners to provide scaleable, reliable assessment, monitoring, and treatment to individuals across a diverse spectrum of neuropsychiatric conditions and severity levels, from severe mental illness to optimizing wellness and productivity. To explore these issues in a cross-disiplinary forum of technologists, psychiatrists and psychologists, the 7th International Symposium on Pervasive Computing Paradigms for Mental Health (mindcaresymposium.org) was held at MIT’s Sanberg Center in Cambridge, Massachusetts, in January 2018.

For Further information about the special issue, please visit http://www.mdpi.com/journal/sensors/special_issues/mindcare2018.
Message from the Editorial Board

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Ei Compendex, Inspec (IET) and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 24 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in 2017).
