Message from the Guest Editor

Dear Colleagues,

The chemical sensor in a flow analysis system is crucial for determining its analytical performance, cost, and possibilities for its miniaturization and automation. The rapid progress in sensor science in recent years has resulted in the development of flow analysis systems with enhanced analytical capabilities. At the same time, novel and exciting applications of established sensors in flow analysis have also been reported in the literature. Therefore, we have decided that it is timely to compose a Special Issue of Sensors focusing on the important role sensors play in flow analysis. You are invited to submit manuscripts illustrating the suitability of newly developed sensors for flow analysis applications, as well as manuscripts describing novel applications of established sensors in solving real life analytical problems.

Prof. Dr. Spas D. Kolev

Author Benefits

Open Access: free for readers, with publishing fees paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Ei Compendex, INSPEC (IET) and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 30 days after submission; acceptance to publication is undertaken in 6 days (median values for papers published in this journal in 2016).

Sections: published in five topical sections.
