### Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on new approaches in the area of wireless sensor networks for home monitoring. A wide range of sensors (e.g., accelerometers, gyroscopes, magnetometers, BLE) are now available in wearable devices such as smartwatches and activity wristbands, providing data that can be used to continuously monitor users' activity.

Some possible applications of interest for this Special Issue are sensors and techniques for monitoring people at home, unintrusive indoor localization, assessment of gait, balance, and postural transitions, physical activity patterns, life-space mobility, age-related chronic diseases/syndromes, etc
