Message from the Guest Editors

To reach equal opportunities in our society, access to credible accessible information is of prime importance for all generations. Access to (digital) information about services and products is crucial. Van den Hoven (2017), referring to Rawls, goes so far as to refer to accessible information as a “primary good.” As all citizens have an equal right to access to information, Bovens (2002) and Bovens & Loos (2002) even advocate granting citizens information rights, next to the classic (freedom) rights. Fake News endangers the accessibility of information for younger and older citizens. The question is how we can fight fake news so all generations continue to have access to credible accessible information.

This Special Issue is about technological, legal, and/or educational measures to fight fake news in health information (e.g., Covid-19, entertainment, news etc.) so citizens have access to credible digital information. We invite you to submit original manuscripts focusing on such measures for younger citizens, older citizens, or a comparison of both groups.

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [RePEc](#), [EconBiz](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Social Sciences*)
