Message from the Collection Editors

Dear Colleagues,

The warmest years on record have all occurred in the last couple of decades with the hottest five since 2015. Climate change is no longer a future scenario - it is here now. Some regions have already felt the adverse impacts of climate change more quickly and severely than other places on earth. Displacement from extreme events in this era *is* climate displacement, and climate migration is happening now all over the world. While cyclones/hurricanes, torrential flooding, storm surge, heat waves, etc. are not new phenomenon, the latest science now attributes increased intensities of these extreme events to climate change.

It is from the temporal dimension of ‘now’ that this special edition seeks to solicit papers. Against this backdrop, the novel COVID-19 virus and resulting pandemic has also brought unintended barriers to movement and has triggered additional migration issues such as health security, travel restrictions, and border closures. The current moment is unique as it poses multiple and overlapping challenges to mobility decision-making and climate change-induced migration.

Message from the Editor-in-Chief

Social Sciences is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*General/Social Sciences*)
