Message from the Guest Editors

Dear Colleagues,

In recent decades, driven by environmental concerns and the need to foster sustainable practices, the concept of a circular economy has emerged as a way to perceive and address waste management. At its core, the circular economy seeks to minimize waste generation, promote the responsible use of resources, and maximize the longevity of products and materials through innovative strategies and technologies. This transformative approach represents a shift from traditional linear consumption patterns to the 3Rs (reduce, reuse, and recycle) waste management policies and hierarchy.

In this context, we are pleased to invite you to contribute to the Special Issue titled "Towards Circular Economy: Innovations in Waste Management and Technological Solutions". The present Special Issue aims to explore the latest advancements in waste reduction, recycling, sustainable materials, green technologies, and circular supply chains. By examining these innovations, we hope to foster a deeper understanding of how science and technology can play a pivotal role in driving us closer to a circular economy and, in turn, a more sustainable world.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
