Deadline for manuscript  
submissions:

**30 September 2024**

### Message from the Guest Editors

Dear Colleagues,

Climate change is being reported around the world and is altering the living environment of many living organisms on the Earth's surface. Despite numerous scientific alerts on changing environmental conditions, their effects on the biology and ecology of species in aquatic ecosystems taken in their typological diversity are still incompletely understood. Regardless, the tools for studying the biology and ecology of species have recently made great progress.

These types of studies are essential to better understand the global effects of changes in environmental conditions, especially in aquatic ecosystems (physical habitats, biocenosis); the variety in species' responses in a typologically aquatic environment diversity including marine, estuarine, lagoon, lake and riverine ecosystems; and the proposals for remedies/solutions associated with this aquatic ecosystem diversity.

This Special Issue should serve as a platform to share new discoveries on the effects of changing environmental conditions, the biological responses of species, and future predictions as well as thoughts on the most likely solutions. Original articles and reviews are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
