Message from the Guest Editor

Climate change and/or the climate vagaries increasingly manifest themselves in increasingly frequent extreme events that hinder the functioning of societies and expose individuals to extremely stressful situations that endanger the quality of life, way of life and even the lives of the societies exposed to them.

This Special Issue aims to discuss the extent to which local and regional societies are exposed to extreme events and are affected by climate change, either by droughts, famines, floods, sea level rise, forest fires, etc., and how they develop and implement strategies to mitigate or adapt to those extreme situations.

We encourage the submission of research and review papers on the several interventional levels possible, from the political and legal framework level to the strategic, methodological and action implementation level.

- Climate Change
- Vulnerability
- Environment and Societal impacts
- Regional/National mitigation/adaptation strategies
- Mitigation/adaptation techniques
- Mitigation/adaptation policies and legislation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
