Message from the Guest Editors

In recent years, biochar has been presented as a possible key material for application in these fields. Biochar is derived from waste biomasses and is used as a substitute for oil-derived carbon materials in several applications. The respect for our world implores researchers to promote new avenues in their research fields orientated to finding ecofriendly solutions for new generations. Reducing oil addiction using new materials and promoting the reuse and transformation of waste materials will help in this regard.

This Special Issue aims to:

1. Explore all the new possible applications in the field of biochar. In particular, we will accept papers where biochar is the key factor for innovative applications that promote sustainability.
2. Provide an up-to-date picture of the recent advances and outstanding innovations in the field of biochar applications. Studies in different fields where biochar is the main actor will be reported.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
