

Emerging Photovoltaic Materials for High-Performance and High-Stable Photovoltaic Applications

Guest Editors:

Dr. Donghyeop Shin

Dr. Hun Park

Dr. Nikolai Tsvetkov

Prof. Dr. Jun Hong Noh

Deadline for manuscript
submissions:

closed (30 September 2021)

Message from the Guest Editors

This special issue aims to discuss the state-of-the-art advances in various PV applications including inorganic (e.g., Si, CIGSSe, CZTSSe), dye-sensitized, organic, and organic-inorganic hybrid (i.e., perovskite) solar cells. Thus, we would like to invite authors to submit their original and high-quality research articles or review papers on novel PV material design/synthesis, device structure, and material/device processing, advanced characterization technologies and modeling toward high-performance/stable photovoltaic devices.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
