### **Message from the Guest Editors**

This call for papers seeks foundation-building research on sustainability in the platform ecosystems era. We welcome original contributions related to both theoretical and practical aspects as per the following themes:

- Economics (i.e., the overall impact of platforms on competition, tax regulation, and business configurations, etc.), social (i.e., privacy and data protection, social inequality, labor standards compared to the old industries, and new labor models, etc.), and environmental (environmental costs of computation, the lack of a global strategy on climate change, and the environmental footprint of platforms, etc.) sustainability of platform ecosystems;
- New sustainable strategies and business models in the platform ecosystems era;
- Organizational and managerial challenges for platform ecosystems sustainability;
- Sustainable innovation in platform ecosystems;
- Platforms and climate change;
- Viability and sustainability of platform ecosystems;
- Systems approaches to sustainability in the platform era;
- Platform ecosystems configuration for sustainability.

Interdisciplinary works as well as industry–academia joint research efforts are welcome.
