### Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus not only on climate change-related risk but also on other type of threats. What kinds of risks do cities attempt to address, what types of practices do they institute, and what types of approaches do they apply? Do they adequately address the risks and uncertainties posed? Do they address social issues and reflect social agendas and whether they marginalize urban social issues? Answering these questions will enable us to understand whether the cities of the world are contending with risk and uncertainties in a responsible manner, or, alternatively, becoming death traps for their residents by failing to effectively meet the challenges of countering various risk such as the pressing climate change.
