### Message from the Guest Editor

Rural environmental protection has received increasing attention in recent years. The economic development and population growth of rural areas results in many problems such as environmental pollution, land degradation, resource depletion, biodiversity loss, income loss, and public health risks. These issues are particularly poignant in villages and remote regions of developing countries. The rural areas often lack required resources to take needed action. The development of the rural economy and the protection of the environment need to be well balanced with both short- and the long-term views. Of interest for rural areas are strategies that can be environmentally, socially, and economically sustainable. How to deal with these problems through sustainable approaches has become an urgent issue in rural areas.

This Special Issue II will be dedicated to the perception of rural, sustainable environmental management based on the integration of economic, environmental, and social considerations. It aims to provide a summary of novel developments that can improve the awareness of and provide solutions to these environmental issues.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
