Message from the Guest Editors

Dear Colleagues,

Nowadays, a major challenge is ensuring food security, especially because of the impacts of climate change, an increasing human population, environmental protection, and economic and energy crises. Agricultural production has evolved from a purely technical focus to a more complex system characterized by social, cultural, political, and economic dimensions and changes.

These agricultural production challenges can be addressed by ensuring the sustainability of such systems by adopting innovative approaches (knowledge and methodology) in developing agriculture that are environmentally friendly yet highly productive, socially equitable, and economically viable...
