closed (31 January 2022)

Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to collect studies focusing on the redefinition of product (service) lifecycle management for sustainable products and services considering the impact of methodologies, technologies, processes, systems, and people in fostering sustainable practices and operations within organizations and along the entire value chain. Embracing a large set of methodologies, technologies, processes, systems, and human resources, product lifecycle management could be able to support companies in sustainable products and services conceptualization, design, manufacturing, delivery, maintenance, and disposal in order to assure the integration of the three sustainability dimensions: economic, social, environmental.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
