Deadline for manuscript  
submissions:

**closed (20 September 2021)**

### Message from the Guest Editor

Sustainable construction management (SCM) is a platform for sustainable and green construction practices. Two key aspects of SCM are resource efficiency and ecological principles. Sustainable building practices have experienced significant growth, while the awareness of global warming and other environmental issues has gained momentum. Despite indications of significant growth, SCM has not been without challenges and barriers, the most common of which is the premium cost over conventional practices. However, the cost of SCM could be minimized or eliminated through improving the level of communication across the project team, inclusive design charrette processes for project stakeholders, and effective front end planning.

This Special Issue will provide an opportunity for researchers to exchange new ideas across the emerging field. The goal of this Special Issue is to collect high-quality contributions to address the sustainable construction management advancements and best practices.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
