## New Trends in Symmetry/Asymmetry of Image Processing and Computer Vision

Guest Editors:

**Dr. Yuanjie Shao**

School of Electronic Information  
and Communications, Huazhong  
University of Science and  
Technology, Wuhan 430074,  
China

**Prof. Dr. Changxin Gao**

Key Laboratory of Ministry of  
Education for Image Processing  
and Intelligent Control, School of  
Artificial Intelligence and  
Automation, Huazhong  
University of Science and  
Technology, Wuhan 430074,  
China

Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editors

Dear Colleagues,

We are delighted to announce the launch of a Special Issue on "New Trends in Symmetry/Asymmetry of Image Processing and Computer Vision". The field of image processing and computer vision has witnessed remarkable advancements in recent years, reshaping the visual relationship between humans and machines. As artificial vision continues to evolve, it permeates various aspects of our lives, revolutionizing industries and enhancing our understanding and interaction with the world. Visual signal processing plays a pivotal role in diverse domains, ranging from manufacturing, medicine, defense, and security to autonomous navigation, robotics, social interaction, and the automotive industry. This Special Issue aims to explore the profound impact of symmetry and asymmetry in image processing and computer vision, shedding light on emerging trends and cutting-edge research.

## Editor-in-Chief

### Prof. Dr. Sergei D. Odintsov

1. Institució Catalana de Recerca  
i Estudis Avançats (ICREA),  
Passeig Luis Companys, 23,  
08010 Barcelona, Spain  
2. Institute of Space Sciences  
(ICE-CSIC), C. Can Magrans s/n,  
08193 Barcelona, Spain

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
