## **Application of Symmetry in Biomechanics**

Guest Editors:

#### Prof. Dr. Dragan Mirkov

Faculty of Sport and Physical Education, University of Belgrade, 11030 Belgrade, Serbia

#### Prof. Dr. Saša Đurić

Liberal Arts Department, American University of the Middle East, Egaila 54200, Kuwait

#### Prof. Dr. Vedrana Sember

Faculty of Sports, University of Ljubljana, 1000 Ljubljana, Slovenia

Deadline for manuscript submissions: **30 November 2024** 

# Dear Colleagues,

Message from the Guest Editors

We are pleased to announce a Special Issue inviting research contributions on the role of symmetry in biomechanics and sports science, focusing on its multifaceted challenges and unresolved questions. This Special Issue seeks to cover various aspects, including iniurv prevention. rehabilitation. performance optimization, and biomechanical analysis. Submissions that delve into topics such as individual variability in athletes' symmetry, advancements in measuring and analyzing symmetry in dynamic movements, and the interplay between symmetry and asymmetry in different sports contexts are encouraged. Contributions that investigate training interventions for improving symmetry and longitudinal studies on the long-term effects of symmetry and asymmetry on injury risk and athletic performance are also welcome.

## **Editor-in-Chief**

#### Prof. Dr. Sergei D. Odintsov

 Institució Catalana de Recerca i Estudis Avançats (ICREA), Passeig Luis Companys, 23, 08010 Barcelona, Spain
Institute of Space Sciences (ICE-CSIC), C. Can Magrans s/n, 08193 Barcelona, Spain

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
