Human Factors in Complex Systems

Guest Editors:

Prof. Dr. Waldemar Karwowski

Department of Industrial
Engineering and Management
Systems, University of Central
Florida, Orlando, FL 32816, USA

Dr. David Kern

President, Kern Technology
Group LLC, Virginia Beach,
Virginia, VA 23452, USA

Prof. Dr. Atsuo Murata

Department of Intelligent
Mechanical Systems, Graduate
School of Natural Science and
Technology, Okayama University,
Okayama 700-8530, Japan

Message from the Guest Editors

This Special Issue aims to explore a broad spectrum of research questions related to human factors in complex systems. In particular, this Special Issue will publish papers advancing the current state of knowledge regarding the essence of human and system complexity, as well as human-system interactions that may exhibit emergent properties, nonlinearity, and deterministic chaos in human performance and human-system behaviors. We invite papers for peer review that are related to theories, methodologies, and applications of the complexity paradigm in all aspects of human activity, including, but not limited to, social, cognitive, biomechanical, neurophysiological, sociotechnical, ecological, and environmental, as well as other relevant considerations of the human dimensions of complex systems.

Deadline for manuscript

Special Issue

systems

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. William T. Scherer

Chair, Department of Systems
and Information Engineering,
University of Virginia,
Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q2 (*Social Sciences, Interdisciplinary*) / CiteScore - Q2 (*Modeling and Simulation*)
