

Theory and Practice in System Dynamics Modelling

Guest Editor:

Prof. Dr. Vladimír Bureš

Faculty of Informatics and
Management, University of
Hradec Králové, Rokitanského
62, 50003 Hradec Králové, Czech
Republic

Deadline for manuscript
submissions:

closed (15 March 2018)

Message from the Guest Editor

System dynamics has helped to improve our understanding of the world around us in various domains. Nowadays, system dynamics represents a methodological approach, for which tools and techniques have already been developed and applied by academicians, consultants, practitioners, educators, managers or policy makers.

This Special Issue invites papers covering a broad range of topics, ranging from methodological issues to application case studies.

Possible topics of interest are (but are not limited to) the following ones:

- Case studies from various domains based on robust and strict methodology
 - Analysis of feedback loops
 - Comparative analysis with other modelling approaches
 - Computer simulations
 - Identification of generic structures or system archetypes
 - Advances of system dynamics methods and tools for more appropriate analysis of system behavior
 - Issues related to modelling and simulation of hard or soft systems
 - Strategies and procedures applicable in modelling and simulations
 - Application of systems thinking in practice
 - Capturing of dynamics in mental models

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q1 (Modeling and Simulation)
