Deadline for manuscript submissions:

closed (30 July 2016)

Message from the Guest Editor

Dear Colleagues,

Spark plasma sintering is attracting significant interests for the processing of difficult-to-sinter and advanced materials including bulk amorphous alloys, nanostructured and finegrained materials, ultra high temperature ceramics, nanocomposites, and coatings. This Special Issue aims to highlight the recent developments related to processing/synthesis, process modelling, microstructure/properties characterization, and scalability for spark plasma sintering of materials.

Dr. Sandip P. Harimkar *Guest Editor*

Materials Group, Department of Mechanical Engineering, National University of Singapore, 9 Engineering Drive 1, Singapore 117576, Singapore

Message from the Editor-in-Chief

Technologies, provides a single focus for reporting on developments of all technologies, regardless of their application. It is our intention that Technologies becomes the journal of choice for both researchers wanting to publish their work and technologists wishing to exploit the high quality research across a wide range of potential applications. Through its open access policy, its quick publication cycle, Technologies will facilitate the rapid uptake and development of the research presented, ultimately providing benefit to the wider society.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within ESCI (Web of Science), Scopus, Inspec, INSPIRE, and other databases.

Journal Rank: CiteScore - Q1 (Computer Science (miscellaneous))
