Message from the Guest Editors

Low vaccination coverage has resulted in the re-emergence of infectious diseases, especially in regions where the vaccine coverage has been below its 90% national target.

It is also worth understanding that immunization services need to be considered within the context that the services are implemented to understand the barriers to vaccine uptake. Several tools have been developed to understand socio-behavioural factors relating to vaccine uptake. At the same time, there are tools designed to understand the system's challenges in improving healthcare systems to improve vaccination uptake.

Based on your extensive knowledge and experience, we invite you to contribute with an original report, original observation, or review, to highlight issues relating to the following: i) vaccine hesitancy and acceptance, ii) missed opportunity for vaccination, iii) interventions to improve vaccine uptake, iv) current trends in immunization services impacting vaccination uptake, v) COVID-19 impact on other healthcare services and vi) lessons learned from the COVID-19 pandemic to better prepare for the next pandemic.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
