Viral Neuro-Immunology

Guest Editor:

Prof. Dr. Walter Royal, III

Department of Neurobiology and Neuroscience Institute, Morehouse School of Medicine, Atlanta, GA, USA

Deadline for manuscript submissions:

15 June 2024

Message from the Guest Editor

Dear Colleagues,

It is widely recognized that immunological responses to nervous system viral infection, while critical for clinical recovery, can be important drivers of primary disease progression and for the development of secondary complications. This Special Issue of Viruses will focus on recent advances in the development of models of previously understudied mechanisms $\circ f$ the neuropathogenesis of immune-mediated disease and disorders that result from retroviral, coronavirus, arboviral. and enteroviral infections. Submissions should focus on both in vivo and in vitro models, highlighting those that can be genetically engineered to allow for flexibility in design and application.

Prof. Dr. Walter Royal, III Guest Editor

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
