Advances in Flavivirus Research

Message from the Guest Editor

Dear Colleagues,

In this special issue of *Viruses*, we aim to assemble a collection of research papers and reviews that highlight critical advancements in our understanding of flavivirus pathogenesis and countermeasure development. Of particular interest are the development of novel animal models, the immune responses to flavivirus infection, virus-host cell interactions to include intracellular signaling and entry/egress processes, vector-host interactions, novel discoveries in flavivirus pathogenesis, vaccine development and advances in medical countermeasure development.

Dr. Michael Holbrook
Guest Editor

Author Benefits

- **Open Access**: free for readers, with publishing fees paid by authors or their institutions.
- **High visibility**: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed) and other databases. Full-text available in PubMed Central.
- **Rapid publication**: manuscripts are peer-reviewed and a first decision provided to authors approximately 33 days after submission; acceptance to publication is undertaken in 8 days (median values for papers published in this journal in 2016).
- **Editorial Section** highlighting important developments to a broad audience of virologists and written by leading experts in the field.
