Viral Recombination: Ecology, Evolution and Pathogenesis

Message from the Guest Editor

Dear Colleagues,

Viral recombination is a central aspect of virus ecology, evolution and pathogenesis. This special issue of Viruses is dedicated to explore and discuss aspects of viral recombination. We hope to assemble a collection of research papers and reviews that together will offer a comprehensive view on this rapidly developing field, which reflects our current understanding, and looks toward the future. Topics may include recombination mechanisms, evolutionary aspects of recombination, gene acquisition, emergence of novel viruses, recombination in the development of antigenic variation, and viral replication.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section. Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed) and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 4.55 days (median values for papers published in the first six months of 2018).
