Deadline for manuscript  
submissions:

**31 December 2018**

### Message from the Guest Editors

Dear Colleagues,

China Meteorological Assimilation Driving Datasets for the SWAT model (CMADS) were developed and provided high resolution and quality meteorological data for the community. Over the past few years, the CMADS data set has received worldwide attention from applicants such as the USA, Germany, Russia, Italy, India, Korea, etc.

This Special Issue on “CMADS in East Asia” invites papers that report recent advances in the modeling of water quality and quantity in watersheds using CMADS and the hydrological model on a wide range of topics. These include, but are not limited to, water resource modeling, hydrological ecology, water ecological footprint, non-point source pollution, meteorological verification, meteorological analysis, atmospheric and hydrological coupling, changes in water resources under climate change, optimal operational of reservoirs, water footprint assessment. We encourage submissions based on theoretical, computational and field studies that involve multiple hydrologic domains and interactions, as well as contributions that demonstrate novel applications.

Prof. Dr. Hao Wang

Netherlands

## Message from the Editor-in-Chief

The relevance of water in human development and sustaining life fuels general and scholarly interest in the world's water resources. A better understanding of all aspects of water and its relation to food supply, energy production, human health, and the functioning of ecosystems is key in managing this precious resource in a sustainable, efficient and equitable manner. Water invites authors to provide innovative original full articles, critical reviews and timely short communications. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the **Science Citation Index Expanded** (Web of Science), Ei Compendex and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 6.2 days (median values for papers published in this journal in 2017).
