## Management of Solid Waste and Landfill Leachate

Guest Editors:

**Prof. Dr. Javier Rodrigo-Illarri**

Institute of Water and  
Environmental Engineering.  
Polytechnic University of  
Valencia (IIAMA-UPV), 46022  
Valencia, Spain

**Prof. Dr. José-Esteban Capilla-  
Romá**

Institute of Water and  
Environmental Engineering.  
Polytechnic University of  
Valencia (IIAMA-UPV), 46022  
Valencia, Spain

**Dr. María-Elena Rodrigo-  
Clavero**

Institute for Water and  
Environmental Engineering  
(IIAMA), Universitat Politècnica de  
València, 46022 Valencia, Spain

Deadline for manuscript  
submissions:

**25 October 2024**

### Message from the Guest Editors

The effective management of solid waste and landfill leachate is crucial for environmental protection and public health. This Special Issue of *Water* seeks to showcase innovative solutions for effective and sustainable leachate management. We invite submissions that explore new technologies, materials, or modeling approaches that can significantly improve current practices.

This Special Issue aims to contribute to the advancement of landfill leachate management by:

- Highlighting the potential of new technologies and materials for efficient and cost-effective leachate treatment.
- Promoting the development of robust models for improved leachate generation prediction and treatment process design.
- Providing a platform for researchers and practitioners to share knowledge and experiences in novel leachate management approaches.

**Keywords:** landfill management; leachate modelling; treatment technologies; environmental risks

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
