Assessment of Watershed Ecosystem Services under Climate Change and Urbanization

Guest Editors:

Dr. Zhihui Li

Institute of Geographic Sciences
and Natural Resources Research,
Chinese Academy of Sciences,
Beijing 100101, China

Dr. Qing Zhou

College of Public Administration,
Huazhong Agricultural University,
Wuhan 430070, China

Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editors

This special issue focus on how climate change and urbanization affect watershed ecosystem services change; research from perspectives of spatial ecosystem services supply and demand assessment, interactions between human and natural systems, multi-scale driving mechanism analysis etc. in key urban areas should be further enhanced. We welcome the submission of high-quality conceptual and empirical papers for ideas and inspirations related to the topics include, but are not limited to:

Assessment of watershed ecosystem services;
Impacts of climate change and urbanization on ecosystem services;
Industrial structure adjustment and optimization for coordinated development;
Regulation policy for watershed ecosystem restoration;
Carrying capacity of water environment;
Climate change, urbanization and water quality.

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
