Chemical Analysis and Ecotoxicological Effects in Aquatic Ecosystems

Guest Editors:

Prof. Dr. Patrícia Palma

Institute of Earth Sciences (ICT-Evora)/Polytechnic Institute of Beja, 7800-295 Beja, Portugal

Dr. Matilde Moreira-Santos

Department of Life Sciences, Centre for Functional Ecology - Science for People and the Planet, University of Coimbra, Calçada Martim de Freitas, 3000-456 Coimbra, Portugal

Deadline for manuscript submissions:

20 July 2024

Message from the Guest Editors

The main objective of this Special Issue is to bring together current research and reviews that address the integration of exposure routes, concentrations, and the resulting ecotoxicological effects of hazardous substances of a high actual concern, such as pharmaceuticals, personal care products, nanomaterials, nanoplastics, plant protection products, potentially toxic metals, and organic substances, in both freshwaters and marine aquatic ecosystems across geographic regions. Furthermore, sensitivity studies of ecotoxicological indicators to improve ecosystem disruption analysis and monitoring programmes, environmental risk assessment procedures, and environmental chemical prioritization studies of relevance under specific environmental conditions and geographic regions are also welcome.

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
