Message from the Guest Editors

Dear Colleagues,

Our goal is to plan a Special Issue on “Small Scale and Decentralized Wastewater Treatment and Reuse within the Concept of a Circular Economy” to be published in Water. The manuscripts, which will be selected for publication, will demonstrate the state-of-the-art in wastewater treatment technologies, including various aspects related to wastewater treatment technologies, water reuse suitable for small scale and decentralized systems, recharge of wastewater to the underground and how these affect the circular economy concept. It will also include innovative onsite treatment and reuse systems, where the circular economy approach is shown at a household level.

Dr. Simos Malamis
Dr. Evina Katsou
Dr. Alper Baba

Author Benefits

Open Access: free for readers, with publishing fees paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 29 days after submission; acceptance to publication is undertaken in 7 days (median values for papers published in this journal in 2016).
