The relevance of water in human development and sustaining life fuels general and scholarly interest in the world’s water resources. A better understanding of all aspects of water and its relation to food supply, energy production, human health, and the functioning of ecosystems is key in managing this precious resource in a sustainable, efficient and equitable manner. Water invites authors to provide innovative original full articles, critical reviews and timely short communications. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Impact Factor 1.687** (2015 Journal Citation Reports®)
- **Thorough Peer-Review**
  - **Coverage by Leading Indexing Services** SCIE-Science Citation Index Expanded (Clarivate Analytics, formerly Thomson Reuters) Compendex / Engineering Village (Elsevier), Scopus (Elsevier)
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI membership program
Aims and Scope

*Water* (ISSN 2073-4441) is an international and interdisciplinary open-access journal covering all aspects of water, including water science, technology, management and governance. It publishes original research papers, critical reviews and short communications. There is no restriction on the length of the papers.

Full methodical and/or experimental details must be provided for research articles. We encourage scientists to publish their research in as much detail as possible. Computed data or files regarding the full details of the experimental procedure or model set-up, if unable to be published as part of the main manuscript, can be deposited as supplementary material.

Water Management and Governance
- Hydrology & Hydraulics, Water Scarcity, Flood Risk & Water Quality
- Water & Wastewater Treatment
- Urban Water Management
- Water Footprint Assessment
- Water in relation to Food, Energy & Human Development
- Water and Ecosystems
