Message from the Guest Editors

Dear Colleagues,

Cement is a very common and important material in civil engineering construction, which includes: CaO-based cement and MgO-based cement. Magnesia-based cement has many advantages over calcium cement in terms of performance, but its shortcomings also limit its applications in civil engineering. In recent years, a large amount of fruitful theoretical and applied research has been conducted on the defects of magnesia-based cement, including magnesium phosphate cement, modified magnesium oxysulfide cement, basic magnesium sulfate cement, and magnesium oxychloride cement. Additionally, the application of CO₂ and solid waste in magnesia-based cement is a research hotspot for energy conservation, emission reduction, and the sustainable development of building materials.

We look forward to receiving your contributions.

Dr. Na Zhang

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Ei Compendex**, **CaPlus / SciFinder**, **Inspec**, **Astrophysics Data System**, and other databases.

Journal Rank: **JCR** - Q1 (*Metallurgy & Metallurgical Engineering*) / **CiteScore** - Q2 (*Condensed Matter Physics*)
