

Figure S1. Effects of RBPP-P on the physiological activities of mice. Mice were treated with RBPP-P (20 mg/kg, intraperitoneal injection, once daily) for 8 weeks. (A) Effect of RBPP-P on body weight; (B) Effect of RBPP-P on fasting blood glucose; (C) Effect of RBPP-P on serum alanine transaminase (ALT) level. Results represent mean \pm s.d. ($n = 6$ mice in each group).

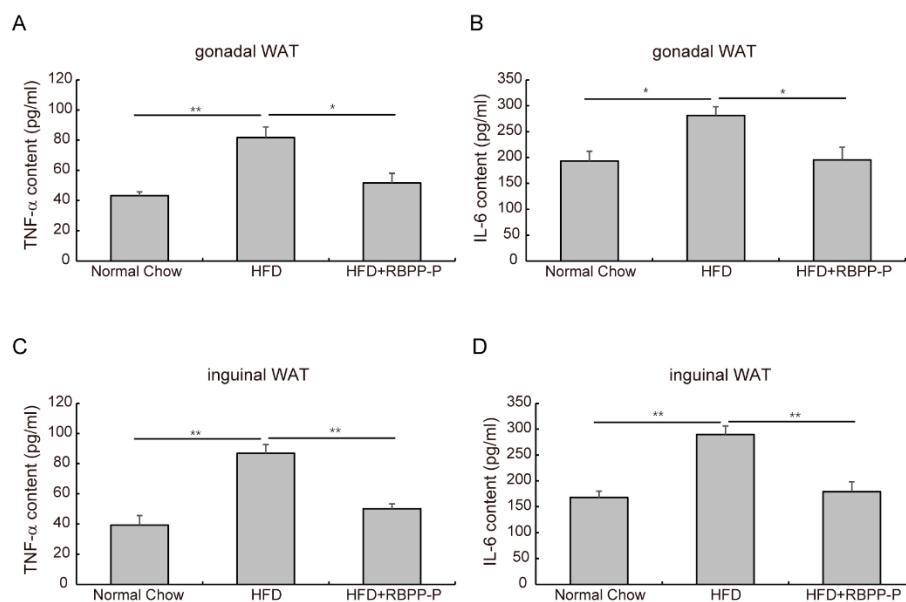

Figure S2. Effects of RBPP-P on contents of cytokines in adipose tissues. HFD-fed mice were treated with RBPP-P (20 mg/kg, intraperitoneal injection, once daily) for 8 weeks. (A) Tumor necrosis factor α (TNF- α) content in gonadal WAT (white adipose tissue). (B) Interleukin 6 (IL-6) content in gonadal WAT. (C) TNF- α content in inguinal WAT. (D) IL-6 content in inguinal WAT. Results represent mean \pm s.d. ($n = 8$ mice in each group). * $p < 0.05$; ** $p < 0.01$.

Table S1. Primer sequences for qPCR.
